AJ Oguntade

(587) 778-1290 | oguntade.site | linkedin.com/in/aj-oguntade | Calgary, AB

Objective

- **Second-year** computer science student expected to graduate in 2029.
- Years of experience in full-stack development, server management, and Collaborative projects.
- Actively learning new skills and located in Calgary, but eager to relocate for positions.

Education

University of Calgary | GPA: 3.8/4.0 (Dean's List) Calgary, AB

Bachelor of Science in Computer Science *Fall 2025 – Expected Spring 2029*

- Awards: Jason Lang Scholarship

Personal Projects

Pawnki | *TypeScript, React, React Native, Supabase* May 2026

Spaced-repetition chess opening trainer for web and Android

- Designed a **PostgreSQL** schema and **serverless Supabase** backend with Row-Level Security and Google auth.
- Architected a **TypeScript** monorepo sharing PGN parsing and tree logic across **React** and **React Native** apps.
- Implemented Anki-style **spaced repetition** (SM-2) to schedule daily reviews of opening positions.

The Living Lexicon (CalgaryHacks, **6th of 100+ registered teams**) | *React, Node.js, Firebase* February 2026

Crowdsourced dictionary for tracking modern slang and its trends over time

- Co-developed a slang dictionary platform in a 3-person team with **REST APIs** and **Firebase**.
- Built the web interface with **React** and **Tailwind CSS**, turning the team's concept into a working demo.
- Pitched the problem, technical design, and product vision to a panel of judges.

Transit Planner API and Mobile App | *Golang, SQLite* March - April 2024

Public transit route planner built on GTFS schedule data

- Found optimal bus and train routes in **under 1 second** with shortest path algorithm (A*) implemented in a Golang **Rest API**.
- Implemented a **CLI** database builder to convert GTFS zip files into **SQLite** databases, enabling **deployment** on any **server**.
- Implemented client-side processing of GTFS zip files into local SQLite databases for offline mobile use.

Experience

Vice President | Technology September 2026 – Present

Computer Science Undergraduate Society (CSUS), University of Calgary *Calgary, AB*

- Maintain **csus.club**, the **Next.js** platform serving **3,000+ members** and **8,000+ monthly views**.
- Support the **calgaryhacks.ca** rebuild, the registration site for **one of Calgary's largest hackathons**.
- Oversee internal tools, including a **Python** Discord bot and a room-booking Chrome extension.

Executive Director of Communications September 2026 – Present

University of Calgary Chess Club (UCCC) *Calgary, AB*

- Run the club's **tech and systems**, including its website, online tools, and member communications.
- Manage the club's social media, designing posts and promotional graphics to grow membership.
- Plan and organize events such as tournaments and casual meetups, from logistics to day-of operations.

Technical Skills

Backend & Database: Firebase, **Golang**, **SQL**, Data Processing, **Server** Management, **Linux**
Web Development: **JavaScript**, **Typescript**, **HTML/CSS**, **React**, **Next.js**, **Cloudflare**, Tailwind CSS, Server-Side Rendering (SSR), HTMX
Mobile Development: Flutter/Dart, **React Native**
Other Languages: **C/C++**, C#, **Python**
Design & Office: App/Website Graphics, Brand Consistency, Marketing Material Design, Microsoft Office
Soft Skills: Versatility, Optimism, Problem Solving & Troubleshooting, Communication, Data Structures
