AJ Oguntade

(587) 778-1290 | oguntade.site | linkedin.com/in/aj-oguntade | Calgary, AB

Objective

- Second-year computer science student with a **3.8/4.0 GPA** expected to graduate in 2029.
- Years of experience in full-stack development, server management, and Collaborative projects.
- Actively learning new skills and located in Calgary, but eager to relocate for positions.

Education

University of Calgary | GPA: 3.8/4.0 (Dean's List) Calgary, AB
Bachelor of Science in Computer Science *Expected Spring 2029*
- Awards: Jason Lang Scholarship

Personal Projects

Transit Trip Planner | *Golang, SQLite* March - April 2024
- Found optimal bus and train routes in **under 1 second** with shortest path algorithm (A*) implemented in a Golang **Rest API**.
- Implemented a **CLI** database builder to convert GTFS zip files into **SQLite** databases, enabling **deployment** on any **server**.
- Implemented client-side downloading and processing of GTFS zip files for offline use on mobile devices.

The Living Lexicon (CalgaryHacks, **6th of 100+ registered teams**) | *React, Node.js, Firebase* February 2026
- Co-developed a language-learning platform in a 3-person team with **REST APIs** and **Firebase**.
- Built the web interface with **React** and Tailwind CSS, turning the team's concept into a working demo.
- Pitched the problem, technical design, and product vision to a panel of judges.

composite-highlighting.nvim | *Lua, Neovim, Treesitter* February - February 2025
- Developed and published an **open-source** tool for enabling proper syntax highlighting when working with templating languages.
- Designed a configurable **API** supporting multiple template engines (Go templates, Jinja2, ERuby) with sensible defaults and fallback logic.
- Implemented a custom Treesitter injection directive with dynamic inner-language detection based on filename conventions.

Experience

Vice President | Technology September 2026 – Present
Computer Science Undergraduate Society (CSUS), University of Calgary *Calgary, AB*
- Maintain **csus.club**, a **Next.js** platform on **Cloudflare** Workers for event RSVPs, **internal tooling**, and elections.
- Support the rebuild of **calgaryhacks.ca** into a full hackathon platform for registration, teams, and judging.
- Oversee internal tools, including a **Python** Discord bot and a room-booking Chrome extension.

Graphic Design Intern July 2023 – August 2023
Canadian Imperial Advantage *Edmonton, AB*
- Created visually compelling posters and advertisements for Instagram, enhancing brand visibility and engagement.
- Managed up to 5 projects simultaneously, meeting tight deadlines and ensuring high-quality deliverables.
- Collaborated with the Marketing Team to develop and execute promotional strategies and campaigns.
- Designed social media graphics ensuring consistency with brand guidelines.

Technical Skills

Backend & Database: Firebase, **Golang**, **SQL**, Data Processing, **Server** Management, **Linux**
Web Development: **JavaScript**, **Typescript**, **HTML/CSS**, **React**, **Next.js**, **Cloudflare**, Tailwind CSS, Server-Side Rendering (SSR), HTMX
Mobile Development: Flutter/Dart, **React Native**
Other Languages: **C/C++**, C#, **Python**
Design: App/Website Graphics, Brand Consistency, Marketing Material Design
Soft Skills: Versatility, Optimism, Problem Solving & Troubleshooting, Communication, Data Structures
