AJ Oguntade

(587) 778-1290 | oguntade.site | linkedin.com/in/aj-oguntade | Calgary, AB

Objective

- Second-year computer science student (**3.8/4.0 GPA**) returning to studies after a Summer 2027 work term.
- Experience in application support, troubleshooting, and building tools with **SQL**, **Python**, and **REST APIs**.
- Calgary-based and eager to help an Information Systems team deliver customer-focused technology solutions.

Education

University of Calgary | GPA: 3.8/4.0 (Dean's List) Calgary, AB
Bachelor of Science in Computer Science *Expected Spring 2029*
- Awards: Jason Lang Scholarship

Personal Projects

Transit Trip Planner | *Golang, SQLite, REST API* March - April 2024
- Found optimal bus and train routes in **under 1 second** with shortest path algorithm (A*) implemented in a Golang **REST API**.
- Implemented a **CLI** database builder to convert GTFS zip files into **SQLite** databases, enabling **deployment** on any **server**.
- Implemented client-side downloading and processing of GTFS zip files into local SQLite databases for offline use on mobile devices.

The Living Lexicon (CalgaryHacks, **6th of 100+ registered teams**) | *React, Node.js, Firebase* February 2026
- Co-developed a language-learning platform in a 3-person team with **REST APIs** and **Firebase**.
- Built the web interface with **React** and Tailwind CSS, turning the team's concept into a working demo.
- Pitched the problem, technical design, and product vision to a panel of judges.

composite-highlighting.nvim | *Lua, Neovim, Treesitter* February 2025
- Developed and published an **open-source** tool for enabling proper syntax highlighting when working with templating languages.
- Designed a configurable **API** supporting multiple template engines (Go templates, Jinja2, ERuby) with sensible defaults and fallback logic.
- Implemented a custom Treesitter injection directive with dynamic inner-language detection based on filename conventions.

Experience

Vice President | Technology September 2026 – Present
Computer Science Undergraduate Society (CSUS), University of Calgary *Calgary, AB*
- Oversee the society's **GitHub** repositories and their **Markdown** documentation and onboarding guides.
- Maintain **csus.club**, a TypeScript platform backed by a **SQL** database for event RSVPs, check-in, and elections.
- Oversee tools that **automate** club processes, including a **Python** Discord bot and a room-booking extension.
- Work with the executive team to identify technology needs and prioritize improvements to club systems.

Graphic Design Intern July 2023 – August 2023
Canadian Imperial Advantage *Edmonton, AB*
- Managed up to 5 projects simultaneously, meeting tight deadlines and ensuring high-quality deliverables.
- Collaborated with the Marketing Team to develop and execute promotional strategies and campaigns.
- Designed social media graphics ensuring consistency with brand guidelines.

Technical Skills

Data & Backend: **SQL**, SQLite, **REST APIs**, Golang, Firebase, Data Processing, **Linux**, Server Management
Programming (OOP): **Python**, **C++**, **C#**, JavaScript/TypeScript
Web Development: React, Next.js, Cloudflare, HTML/CSS, Tailwind CSS
Tools & Documentation: Git/GitHub, Markdown, CLI tools, **Microsoft Office**
Soft Skills: Troubleshooting & Problem Solving, Communication, Teamwork, Time Management
